

Highlights

STUDENT INTERVENTION

Allows administrators to see students that have not been attending class by certain date range or never attended class in order to reach out to specific students to do targeted outreach for additional student success and persistence.

VERIFICATION REPORTING

The ability to view student's last date of attendance by those who have never attended, haven't attended for a specific number of days or within a certain date range.

MULTIPLE VIEWS

Better understand the root of attendance issues by having the option to see multiple views and drill down to see if the attendance is an issue with particular students or with specific courses.

STUDENT GROUPS

View attendance reporting on specific groups of students such as honors students, athletes, or international students for both additional reporting purposes and to look for trends in certain student groups.

DATE SPECIFIC LOOK UP

The ability to view attendance reports by specific dates to see possible trends of when students may be attending or not attending class during certain points within a semester.

Coming Soon

ROSTER ACCURACY

This feature will help to make sure that the students attending the class are the students that should be in the class and that there are not students who are unknowingly registered for the class or students that are attending class without being registered.

DATA EXPORTS

Allows users to export specific reports to send them directly to interested parties.

COMPLIANCE REPORTING

The ability to understand the specific attendance criteria that an institution must meet or report to maintain complicit with specific accreditation bodies.
